Remote User Connection Options

Designed to:

Allow “wholesale” customers, of stores that utilized JMK Computerized TDIS software, to remotely access the software via the Internet.

This access will allow those selected accounts to:

1. Place orders with your store directly from their business location.
2. Check stock and costs.
3. Review **their** accounts past activity.
 Only available on options I and II.
4. Review **their** open invoices
 Only available on options I and II.

I. SSH connection via ZTerm.

A. Requirements:

1. Broadband Internet Connection
 - a. Strong preference for a connection with a static IP address
 - b. Can only make connection from pre-established location(s) i.e. cannot use from just any broadband connection.
 - 1) This requirement is to ensure security on the server and protect everyone utilizing the system.
2. PC with ZTerm software installed.
 - a. PC must be networkable and secure.

B. One software license per PC

C. Uses standard system screens with restrictions that only allow access to one user account number, the wholesale user accessing the system.

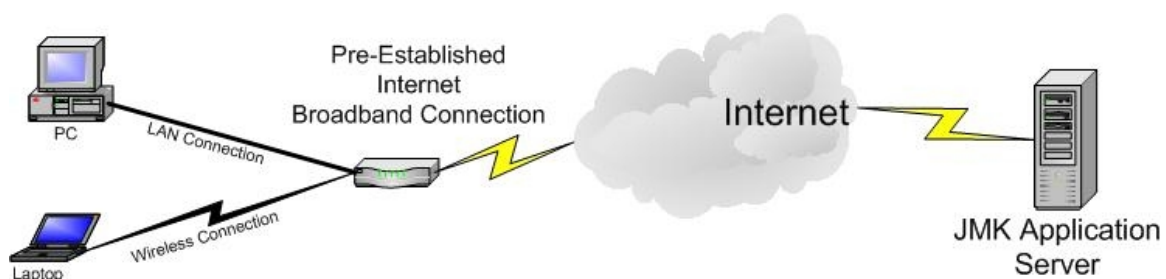

D. Setup and support fees on a per user basis.

PRO

Low Initial Cost
Utilize Existing
Equipment

Con

Manual connection to
server through Internet

II. ZyWall + ZTerm

A. Requirements:

1. Broadband Internet Connection
 - a. Strong preference for a connection with a static IP address
 - b. ISP must allow for setup of your own router to their service.
2. PC with ZTerm software installed.
 - a. PC must be networkable and secure.
3. ZyXell Firewall VPN router.

B. One software license per PC

C. Uses standard system screens with restrictions that only allow access to one user account number, the wholesale user accessing the system.

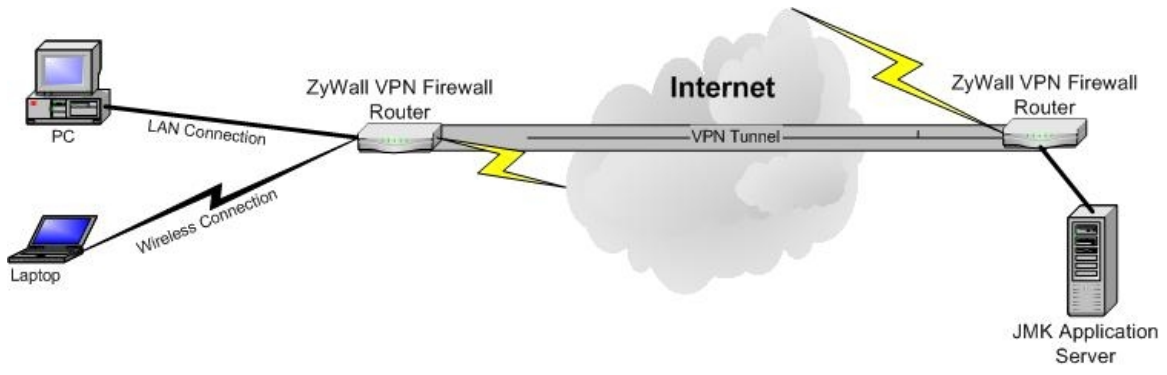

D. Setup fees on a per user basis, support fees and a per location basis.
